Software and Quality Assurance Engineer with a strong foundation in full-stack web development, automation testing, and database management practices. Contributed to product development and QA teams across software companies with working knowledge of algorithms, data structures, service-oriented architecture, API design, and continuous integration tools.

EMPLOYMENT

TD Bank *Toronto, ON*

Customer Experience Associate ***May 2025 – Present***

- Monitored customer account activities to spot trends with the aim of proactively offering tailored product or investment suggestions leading to consistent customer satisfaction.
- Used command-line interfaces to execute internal operations and retrieve customer data via structured queries.
- Provided financial insights to help customers identify potential growth opportunities that led to successful investments.
- Increased branch business with an average of **85%** in monthly reporting.

5GO Ventures *London, UK*

Full Stack Software Developer ***May 2024 – Jan 2025***

- Built and tested responsive web apps using **React**, **Node.js**, and **Express.js**; also identified and resolved **50+** UI/UX and backend defects pre-release.
- Conducted code reviews and wrote unit tests with **Jest**, improving code quality and reducing production bugs.

Sanerclimes Ltd *Lagos, NG*

Quality Assurance Engineer ***Oct 2022 – Dec 2024***

- Executed **150+** manual and automated test cases across Agile teams for MTN mobile apps, covering functional, integration, regression, and UAT phases.
- Built and maintained automated test scripts using **Selenium** and **Cypress**, reducing manual regression effort and improving test coverage.
- Triaged and reported defects across **23+** software releases in Jira, writing clear reports and collaborating with developers to validate fixes in 2-week sprints.
- Validated API endpoints and data integrity using **Postman**, ensuring correct request/response handling and error codes for mobile app features.
- Contributed to release of 2 major features that increased in-app engagement by **30%** through targeted test design and bug prevention.

Seamfix Ltd *Lagos, NG*

Quality Assurance Intern ***Jan 2021 – Jun 2021***

- Developed automated regression test suites with **Selenium**, cutting test execution time by **40%** and supporting CI/CD pipeline validation.
- Performed **cross-browser and integration testing** on web modules, documenting bugs with logs and screenshots for faster developer resolution.
- Facilitated daily standups and sprint retrospectives, improving **test planning** and backlog grooming for the QA team.

SKILLS and TECHNOLOGIES

- **Languages:** JavaScript, Java, Python, HTML, CSS.
- **Frameworks:** Tailwind CSS, Bootstrap, Node.js, Express.js.
- **Methodologies:** Agile/Scrum, CI/CD, SDLC, STLC.
- **Databases:** MySQL, Oracle.
- **Testing:** Jest, Test Case Design, Manual Testing, Automation Testing, Regression Testing, API Testing, Cross-Browser Testing, Bug Triage.
- **Tools:** Git, Postman, Selenium, Cypress, Playwright, Postman, Cucumber, Appium, Jira, Git, Docker, Jenkins.
- **Certifications:** ISTQB Certified Foundation Level, Oracle Java SE 8 OCA/OCP, Oracle 12C SQ.

EDUCATION

Master of Engineering in Software Engineering (4.09/4.33 CGPA) ***Graduated: June 2026***

Ontario Tech University, Oshawa, ON, Canada

- **Relevant Coursework**: Software Dev Methods and Tools, Foundations of Software Engineering, Advanced Optimization, Software Security and Dependability, Advanced Engineering Mathematics, Software Testing and QA, and Network Computing.
- **International Student Leader:** Supporting International students acclimate properly to the Canadian schooling environment and leading collaboration with one another.
- **Engineering Planning Project Team Lead:** Led a 7-member team using the Agile methodology to delegate work, run weekly progress meetings, resolve conflicts, and keep deliverables on schedule; represented the team in meetings with the professor and presented the final project management plan.

Bachelor of Computer Science (4.41/5.00 CGPA) ***Graduated: June 2022***

Babcock University, Ogun, Nigeria

- **Capstone Project Team Lead:** Led a 3-person team developing a personalized inventory scanning system used to scan barcodes of items to keep track of all items available, which in turn made tracking and updating of items faster.
- **Class Project:** Led a 3-person team to build a ML Model used for content moderation, training the model with Sckit-learn and python. The model was able to classify inappropriate text, achieving **92%** accuracy on test dataset and demonstrated strong data validation skills.
